Transduces a signal by increasing the intracellular calcium ions level. Alternative coreceptor with CD4 for HIV-1 infection. SUBCELLULAR LOCATION: Integral membrane protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        PTM: N-glycosylated.
SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             SECURNCE FROM N.A., AND VARIANTS ILE.64 AND GLU-355.

C-C chemokine receptor type 2 (C-C CKR-2) (CC-CKR-2) (CCR-2).
Name=CCr2; Synonyms=Cmkbr2;
                                                                                                                                                                                                                                                                                                                                           Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Buteleostomi;
Mammalia; Butheria; Rodentia; Sciurognathi; Muridae; Murinae; Rattus.

    macrophages.
    INDUCTION: In animals in which experimental allergic encephalomyelitis (EAE) has been induced.
    SIMILARITY: Belongs to the G-protein coupled receptor 1 family.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Extracellular (Potential).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Cytoplasmic (Potential).

-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- TISSUE SPECIFICITY: Detected in monocyte/macrophage cell lines,
but not in nonhematopoietic cell lines.
-!- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    0;

Zhang Y., Ryder O.A., Zhang Y.;

Zhang Y., Ryder O.A., Zhang Y.;

Submitted (AUG-1999) to the EMBL/GenBank/DDBJ databases.

-!- SUBJELLULAR LOCATION: Integral membrane protein (By similarity)

-!- SIMILARITY: Belongs to family 1 of G-protein coupled receptors.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 4, A

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 4, Application US/08450393A

Sequence 4, Application US/08450393A

Patent No. 5707815

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: MAMMALIAN MONOCYTE CHEMOATTRACTANT

TITLE OF INVENTION: ADMINESS:

MUMBER OF SEQUENCES: 14

CORRESPONDENCE ADDRESS:

MEDIUM TYPE: California

COUNTRY: USA

ZIP: 943-06-2155

COMPUTER: IBM PC compatible

OPERATING SYSTEM: PC-DOS/MS-DOS

SOFTWARE: PATENTION NOBER: US/08/450,393A

FILING DATE: MAY 25, 1995

CURSIPICATION NUMBER: US/08/450,393A

FILING DATE: MAY 25, 1995

CURSIPICATION NUMBER: UCAL-237/02US

TELEPAN: 415-643-5165

TELECOMMUNICATION INFORMATION:

MAWE: CSET', LUADN

MAWE: CSET', LUADN

MAWE: A15-643-5165

TELECOMMUNICATION INFORMATION:

MAWE: A15-687-0663

TELERA: 380816COOleyPA

MAPPLICATION OF SEQ ID NO: 4:

SEQUENCE CHARACTERISTICS:

LENGTH: 360 amino acide

TELENGTH: 360 amino acide

Sequence 50, Application US/09045583

Patent No. 6287805

GREERAL INFORMATION:
TITLE OF INVENTION: No. 6287805el Molecules of the G Protein-Coupled NUMBER OF SEQUENCES: 56

CORRESPONDENCE ADDRESS: ADDRESSE: LAHIVE & COCKFIELD, LLP STREFT: 28 State Street
CITY: Boston STATE: ABSachusetts
COUNTRY: USA

ZIP: 02.109

COMPUTER READABLE FORM:
MEDIUM TYPE: Ploppy disk
COMPUTER: 1BW PC Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PatentIn Release #1.0, Version #1.25
CURRENT APPLICATION NUMBER: US/09/045,583
FILING DATE: 20-MRR-98
CLASSIFICATION DATA:
APPLICATION NUMBER: RICHON NUMBER:
FILING DATE:
RELING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 120

                                         GENERAL INFORMATION:

APPLICANT: FORSSWANN, Wolf-Georg; FORSSWANN, Ulf; ADERWANN, Knut;

APPLICANT: FORSSWANN, Wolf-Georg; FORSSWANN, Ulf; ADERWANN, Knut;

APPLICANT: HITLAND, Aleksandra; SPODSBERG, Nikolaj

TITLE OF INVENTION: Cell Surface Proteome of Tumor and Inflammation Cells and

TITLE OF INVENTION: For Treating Tumor Diseases and Inflammatory Diseases,

TITLE OF INVENTION: Receptor Analysis and Chemokine Receptor/Ligand Interaction

TITLE OF INVENTION: Receptor Analysis and Chemokine Receptor/Ligand Interaction

TITLE OF INVENTION: Preferably with the Aid of Specific Chemokine

TITLE OF INVENTION: Receptor Analysis and Chemokine Receptor/Ligand Interaction
